Overview:

This is a great opportunity for a system test engineer to expand his or her skills by working in a dynamic environment supporting electronic warfare (EW) systems for the US Navy. Must be self-motivated with a strong work ethic and interpersonal skills. Sedna offers competitive salaries and benefits, but most importantly, career advancement opportunities. Unlike large businesses, at Sedna, we highly value every employee, we pride ourselves at being extremely productive and delivering high quality products to our customers.

Job Responsibilities:

- Develop test plans and procedures for system level testing
- Perform formal and informal testing following procedures to verify system performance against predetermined system standards and requirements
- Work within team developing RF/IF/digital sim/stim systems for electronic warfare systems

Basic Qualifications:

- Electronic Warfare domain understanding
- Experience with software system integration and testing
- Analytical skills for debugging, hw/sw integration and system testing
- Ability to prioritize tasks to accomplish in a timely manner

Desired Qualifications:

- Experience with the AN/BLQ-10 and/or AN/SLQ-32 sensor systems
- Experience with Unix operating systems (i.e. Red Hat, Centos) and command line interfaces
- Experience with issue and project tracking software (i.e. Jira)
