Overview:

This is a great opportunity for a self-motivated Quality Assurance Specialist with focus on product inspection for military components, products, and systems. Activities are associated with submarine Total Ship Monitoring System (TSMS) and Towed Array (TA) programs. Our products are typically re-packaged COTS and custom components designed into ruggedized units and integrated into a larger enclosure cabinet or system. Products are required to meet submarine and surface ship performance, functional and environmental requirements. Candidate must be self-starter with a strong work ethic and interpersonal skills. Sedna offers competitive salaries and benefits, but most importantly, career advancement opportunities. At Sedna, we highly value every employee and pride ourselves on our productivity and high-quality standards.

Job Responsibilities:

- Perform inspections of electronic assemblies in accordance with industry standards
- Perform inspections of electronic and mechanical assemblies to evaluate conformance with engineering drawings and specifications
- Review and approve Engineering Change Notices to CAD drawings for product assemblies.
- Identify defects against standards, recommend dispositions, and verify rework.
- Design, implement, and maintain Quality Assurance procedures for inspecting, testing, and evaluating assembly products.
- Perform audits, assign corrective actions, and verify implementation.
- Prepare and maintain a wide range of Quality Management System process and procedure related documentation.
